

Analytical Chemistry Internships

Eli Lilly & Co. is seeking motivated interns who desire a career in **analytical chemistry**. Positions offered are 12-week assignments that begin in either May or June of 2007. Each intern will be assigned a project, which will allow him/her to actively contribute to the company and build understanding of the pharmaceutical industry and Eli Lilly & Company. Interns will interact with other professionals, including exposure to Lilly senior management. Professional development and social events will be held throughout the summer. Accomplishments will be presented during a poster session that will be scheduled during the duration of the internship.

Job Responsibilities:

- Provide practical solutions to a real-world project.
- Work individually with supervisor to determine and achieve project goals.
- Document and present project accomplishments at a poster session.

Skill Requirements:

- Currently enrolled in a BS/MS or Ph.D. program related to analytical chemistry, with a graduation date after June, 2007.
- Strong academic performance.
- Strong skills in problem assessment/analysis, communication (written and oral), and teamwork.

Please email your resume by October 13th, 2006 to deo@chem.iupui.edu
